

A Comprehensive Engineering E-Learning Solution using ICT

■ About TekEdge

Students join engineering colleges with an aspiration to fulfil their career ambitions, be it employment or higher education. Faculty plays a vital role in realizing student's aspirations and moulding them into well rounded professionals. Infusion of Technology into the classroom provides an edge to the faculty over conventional classroom teaching.

Quality content coupled with contemporary technology-enabled teaching methodologies goes a long way for achieving this objective. This is what we call as "TekEdge".

TekEdge synergizes faculty efforts and ICT (Information Communication Technology) effectiveness, making classroom learning livelier, interactive and interesting.

TekEdge facilitates faculty to explain complex concepts in an easy to understand manner through rich multimedia, audio, video, animations, simulations, etc.

■ TekEdge for College

Advantages of TekEdge to the college:

- Truly 24x7 access to content
- Right blend of ICT tools and quality content resources
- Empowers faculty and enhances effectiveness
- Improves students engagement and participation
- Attracts students, faculty and increases students admissions
- Increases student pass percentage and academic percentage
- Attracts corporate and enhances placements
- Uplifts college reputation and provides edge over its competitors

The college will be equipped with:

- Interactive classroom with ICT Infrastructure i.e. Digital Whiteboard, Multimedia PC, UPS, LCD Projector
- Lesson Planner for Faculty
- Content for the Faculty consisting of Animations, Images/Pictures, Quiz etc.
- E-learning courseware in LAN and Internet

■ ■ ■ TekEdge for Faculty

Enabling the Faculty to deliver...more!

None can replace the Faculty, and now the Faculty is more equipped with TekEdge!

TekEdge provides the Faculty an edge with the use of technology in teaching, by effectively utilizing the time by overall improving the effectiveness in delivering sessions in an interactive manner.

When an Electronic Whiteboard is connected to the computer and projected, it becomes a giant, touch sensitive version of the computer screen. The selected concepts are projected on to the Interactive Electronic Whiteboard. Faculty will interact with it to present the content effectively and effortlessly.

Faculty can also customize/add the content, author questions etc.

Above all, the Faculty understands the students better and can add his/her flavour and mesmerize the students.
